LinkedIn: <http://www.linkedin.com/in/sandini-wijesinghe96>

PROFESSIONAL SUMMARY

Motivated Senior Software Engineer skilled in full-stack development and scalable software solutions. Proficient in cloud platforms and frontend/backend technologies, staying current with industry trends. Focused on efficient code, performance optimization, and best practices in software development. Skilled problem-solver and innovative-collaborator eager to drive impactful projects.

WORK EXPERIENCE

Sysco Labs, Sri Lanka

Senior Software Engineer

Aug 2024 to Present

- Full-stack development focused on delivering high-quality solutions and providing production support.
- Guided junior engineers, assisting them in overcoming complex technical challenges.
- Expanded experience with AWS, and integrated tools (Google Analytics, Optimizely) to optimize projects.
- On call production support on production bugs and incidents.
- Contributed to the projects with React-Redux, Java, Spring Boot, AWS, GCP, Contentstack (CMS), Elasticsearch, Next.js and PostgreSQL.

Software Engineer

Mar 2022 to July 2024

- Full-stack feature development with ReactJS & Redux, Spring Boot.
- Took on responsibilities for migrating the project's infrastructure from AWS to Google Cloud, ensuring the transition to equivalent Google Cloud services while aligning with business goals and timelines.
- Provided guidance to junior engineers, helping them navigate complex technical challenges.
- Expanded hands-on experience in AWS Services and integrated additional tools such as Google Analytics, Optimizely to improve project outcomes.
- Received Maverick Spot Team Award for displaying the growth mindset behavior.
- Contributed to the projects with React-Redux, Java, Spring Boot, AWS, Contentstack, Elasticsearch, Next.js and PostgreSQL.
- On call production support on production bugs and incidents.

Virtusa, Sri Lanka

Junior Software Engineer (Intern)

July 2020 to January 2021

- Awarded Best Project Team at the Virtusa Service Excellence Awards (2020)
- Gained hands-on experience with cloud service providers and their APIs.
- Contributed to the projects with Angular, Java, and MySQL.

TECHNOLOGY STACK

- **Programming Languages:** Java, JavaScript, TypeScript
- **Web Development:** ReactJS, Next.js, Redux, HTML, Java, Spring Boot
- **Databases:** MySQL, MSSQL, PostgreSQL
- **Search & Content Management:** Elasticsearch, Contentstack, Magnolia
- **Cloud:** AWS Cloud Services, Google Cloud, Fastly
- **CI/CD:** Concourse CI, GitHub

INTERPERSONAL SKILLS

- Excel in teamwork, fostering strong collaboration to achieve project goals.
- Continuously learn from feedback and solve complex problems using best practices.
- Confidently identify and resolve issues with flexible troubleshooting and root cause analysis.
- Work independently with diligence, quickly learning and adapting to new concepts.
- Lead teams with flexibility, communicate clearly, and collaborate well in diverse environments.

PROFESSIONAL CERTIFICATIONS

- **AWS Certified Solution Architect - Associate (SAA-C03)** ([Link](#))
- **Diploma in Management Accounting - Chartered Institute of Management Accountants (CIMA)**

PROJECTS

Sysco Studio Web Application | Career Project

Mar 2022 – Present

- Delivered new features (Front-end, Back-end, Infrastructure, Pipeline, Unit Tests) and managed deployments.
- Managed AWS infrastructure (ECS, S3, CloudFront, ELB) focusing on scalability, availability, cost optimization.
- Integrated Contentstack CMS for dynamic dashboard content management, enabling the business team to modify dashboard content through Contentstack CMS, with real-time updates reflected upon publication.
- Integrated Contentstack workflows and rules to prevent unnecessary publications.
- Integrated live preview feature to review the content changes made before publishing it to the production.
- Developed export report functionality for recipes and menus to Excel and Word formats using Apache POI.
- Optimized the export process for performance, allowing large menus and recipes to be exported without significant delays.
- Implemented a Power BI solution to retrieve customer data for business requirement, reducing the processing time by 75%.
- Provided production support for bugs and incidents.
- **Technologies used:** ReactJS, Spring Boot (Java), PostgreSQL, AWS (ECS, ELB, S3, CloudFront, Secrets Manager, Batch Job), Concourse CI, Datadog, Contentstack APIs, Apache POI, Git

Magnolia to Contentstack Migration for Sysco Websites | Career Project

Aug 2023 – Jan 2024

- The project was to migrate **three Sysco corporate websites** (picaysalpica.sysco.com, sysco.com and sysco.ca) from the Magnolia CMS (Traditional CMS) to Contentstack CMS (Headless CMS) due to licensing reasons.
- Designed content models and developed a migration tool for the transition.
- Created reusable front-end components from scratch using Next.js.
- Integrated Contentstack workflows and rules to prevent unnecessary publications.
- Integrated live preview feature to review the content changes made before publishing it to the production.
- **Technologies used:** Next.js, Contentstack (CMS), Contentstack APIs, Fastly

Elasticsearch Integration for Sysco Websites | Career Project

Oct 2023 – Dec 2023

- Designed the architecture and implemented the search functionality using Elasticsearch for the **Sysco main corporate websites** - <https://www.sysco.com/> and <https://picaysalpica.sysco.com/> websites.
- Engineered seamless integration between Contentstack and Elasticsearch, enabling immediate synchronization of content updates with the search index, ensuring real-time, up-to-date search results.
- Conducted a knowledge transfer (KT) session on the Elasticsearch domain and the underlying architecture of the search functionality for teammates.
- **Technologies used:** Elasticsearch, Next.js, Contentstack (CMS), Contentstack APIs

EDUCATION

University of Moratuwa, Sri Lanka

Jan 2023 - Present

Master of Science in Computer Science | Department of Computer Science and Engineering

University of Moratuwa, Sri Lanka

Sept 2017 – Mar 2022

Bachelor of Science (Hons.) in Information Technology

- CGPA: 3.61 - Second Class Upper Division

Visakha Vidyalaya, Colombo 05

2002- 2016

Advanced in Combined mathematics and Physics

OTHER ACHIEVEMENTS & QUALIFICATIONS

- | | |
|--|----------------|
| • Member of the Toastmasters Club - Sysco LABS | 2022 - Present |
| • Conducted seminar on AWS Storage types to Sysco LABS employees | May 2022 |
| • University Squad Member - University of Moratuwa Swimming team | 2018 - 2021 |
| • MoraXtreme 4.0 coding competition (University of Moratuwa): Final round contestant | 2019 |
